

August 16, 2019

Greetings Everyone,

I hope everyone has had some wonderful summer experiences with your families. As we enter this final stretch of summer there are a few items that I would like mention.

First, along with main lesson books etc., your child brought home a reading folder that contains a reading suggestion list from Mrs Coleman and a book chart to record books that have been read. Please help your 6th grader locate their folder and check in on their summer reading progress. They should return with their book chart and at least 3-5 titles of books that they've read - not all need to be from the list. One of these titles will be used for their first book report.

In the end-of-year reports I indicated the need for an August math review for certain individuals who may have had math support of some nature during the past school year. Mrs Phend is available for this review on August 20,21,27,28,29 from 10:00-11:00 at the school. This can include those who worked with other tutors besides Mrs. Phend. If I've made this recommendation to you, please avail yourself of this offer and let me know that your child will be participating. I'll pass that info on to her.

I want to, very belatedly, say thank you for your kind words and gift that I received from the class at the end of the year. Very much appreciated!

Finally, a heads up to you and your child. Besides Daniel, who the class has met, we are looking to expand the group by several new students. More specifics to come.

Enjoy the remaining summer days !

Best,
Mark
